

POWERWEEDER

POWERWEEDER PRO & MINI CULTIVATORS

POWERWEEDER PROFESSIONAL and the POWERWEEDER MINI are designed to allow the operator to rapidly weed & mulch around valuable plants without damaging them. The unique mulching/cutting action creates an organic "**green manure**", more downward pressure results in a "bare earth" finish. The secret is the smooth upturned edges on both weeders and the downward facing rotor/cutting blades.

A "WORMS EYE VIEW" OF WHAT GOES ON

A TOTALLY NEW CONCEPT IN WEED CONTROL.

Both the weeders are made from highest quality materials, **THEIR DESIGN & QUALITY WILL ONLY EVER BE IMPROVED ON, GUARANTEED !**

Powerweeder Mini was created for BENT/CURVED shaft machines, it allows the smaller types of machines to achieve similar results to the metal fitting.

Domestic & Commercial

Weed right up close & safe.

115mm(4 1/2") - 150mm (6")

Powerweeder Professional was designed for a BRUSHCUTTER, a straight shaft weeding machine, (commercial / heavy duty)

The Powerweeder Mini can be fitted to both straight shaft and curved/bent shaft units, being plastic is recommended for gardens with established soils.
